

EcoSense®

no work®

Daily Shower Cleaner

Say “goodbye” to your weekly shower-scrubbing; say “hello” to a clean and fresh-smelling shower! A 15-second misting of *No Work* puts Melaleuca Oil and other natural ingredients to work on soap scum buildup, leaving your shower spotless. Plus, the concentrated formula gives you twice as many sparkling showers as other leading brands.

No Work's special cleaning booster, *Aqua Charge*®, turns the water droplets left on your shower walls into supercharged cleaners.

Penetrates Soapy Buildup

Aqua Charge ingredient breaks up hard water deposits and leaves behind a protective shield against soap scum and mineral deposits.

Effortless Shine

A 15-second spray after each shower saves you hours of scrubbing.

Smart Way to Save

Unique concentrate saves money and time—the formula can last about twice as long as retail brands.

Keep your shower shining and spot-free—without the work! *No Work*® is the only daily shower cleaner that pairs the natural cleaning properties of Melaleuca Oil with the mineral-softening and sheeting agents of *Aqua Charge*—all in a concentrated solution. A 15-second spray each day leaves your tub or shower sparkling clean.

Penetrates Soapy Buildup

How does *No Work* keep shower walls so clean, without the scrubbing? After you take a shower, spray *No Work* on the walls and floor. A special ingredient called *AquaCharge* combines with the water droplets left on your shower walls and goes to work immediately, pulling minerals and other grimy deposits away from the surface and down the drain. The added penetrating and deodorizing properties of Melaleuca Oil follow up to clean even deeper.

AquaCharge also leaves behind a protective shield between your shower walls and hard water mineral deposits. After using *No Work*, you'll notice that the water runs off the walls before deposits can accumulate. It's specially formulated to keep your shower free of spots and soap scum—all in less time than it takes you to dry off!

Effortless Shine

A clean shower is only two steps away!

1. Dilute the exclusive formula in the custom spray bottle.* It only takes about thirty seconds to mix up 24 ounces of cleaning solution. Used daily, one 24-ounce bottle should last about a month.
2. Lightly mist all the surfaces—walls, floor, and doors—after every shower, then walk away. *No Work* will keep your tile, tub, doors, and curtain so clean you could go months without scrubbing and never know the difference. You don't need to rinse, wipe, scrub, or squeegee afterwards—it does all the work for you!

You can apply *No Work* to almost any surface, including chrome fixtures, plastic shower curtains, fiberglass tub surrounds, grout, caulk, porcelain, or cultured marble. *Aqua Charge* and the water from your shower work together to rinse away hard water spots and soap scum before they have time to set in.

Smart Way to Save Money

No Work saves you money. Each pint of concentrate makes three 24-ounce bottles of ready-to-use shower spray. And because you're reusing the durable spray bottle, you won't be tossing all those retail bottles in the trash. Plus, the *No Work* sprayer is designed to put out a fine, light mist that disperses evenly over surfaces so it lasts even longer. And like other *EcoSense* products, the formula is non-toxic, non-irritating to skin, and has no harsh chemical odor.

Aqua Charge Cleaning Power

No Work's unique formula contains *Aqua Charge*, which turns the water droplets left on shower walls into supercharged cleaners.

- Special ingredients soften soap scum and break apart hard water minerals before they have a chance to set in.
- Sheeting action forms a protective barrier between the shower surface and other substances, so dirt and minerals wash off walls and down the drain.

Aqua Charge is made with gentle, biodegradable ingredients derived from renewable resources.

Simple Steps... Big Effects

No Work keeps your shower spotless and smelling fresh, while saving you work, time, and money. You'll enjoy your clean shower even more when you find out how easy it is to keep it clean!

* Works best with 24 oz. spray bottle. (#4558)

Application Areas

- Tile
- Tub
- Glass shower door
- Fixtures and faucets
- Shower curtain
- Caulk and grout
- Tub surround
- Acrylic or fiberglass wall kits
- Corian
- Terrazzo
- Cultured marble*

* *No Work* is not recommended for use on natural marble surfaces.

Super-Concentrated Value

One pint of *No Work* (\$4.99) makes three 24 oz. bottles of cleaner. That's less than \$1.66 a bottle.

Retail cleaners like Tilex® and Clean Shower® cost, on average, over \$2.50 each. You're saving more than \$1.00 every time you mix up a bottle of *No Work*!

For a really dirty shower, try Tub & Tile first. Once your shower is clean, a daily 15-second spray of *No Work* will help keep it that way.

If you use two bottles of the leading retail shower spray every month, you'll be adding 24 plastic bottles to the landfill every year.

With *No Work*, you reuse the mixing spray bottle. The concentrate is sent to you in a recyclable bottle, so you will be adding less waste to the environment.
