**Did You Know...?**

Fragrances are defined in three stages:

1. **Top notes** are the initial impression you get upon applying the fragrance. These top notes are airy and diffuse quickly.
2. **Middle notes**, or the heart of the cologne, are a blend of less airy ingredients forming the body of a fragrance.
3. **Base notes**, or the last traces of the fragrance, include other notes and scents that diffuse slowly. This stage occurs after the initial notes dissipate and the heart is no longer apparent.

Melaleuca's exclusive perfumes combine refreshing florals and other fragrances that release exotic scents throughout the day.
